

8 Port Gigabit AI PoE Switch

www.hrutech.com

8 Port Gigabit AI PoE Switch, using high-quality high-speed network IC and the most stable PoE chip, the switch incorporates the latest AI functions, equipped with two types port priorities, PoE priority and Network priority, one-key smart. The PoE port meets the 802.3af or 802.3at standard. At the same time, port 1/2 supports HiPoE and the power can reach 60W; The power consumption indicators can help to understand the overall power consumption of the product easily. This series of PoE switches can provide seamless connection for 10/100M Ethernet, and the PoE power supply port can automatically detect and supply power to powered devices that comply with IEEE802.3af or IEEE802.3at standards, and non-PoE devices intelligently detect no power supply, only data is transferred.

Main Features

- 8*10/100/1000M PoE ports
- Comply with IEEE 802.3/ IEEE 802.3u/IEEE 802.3ab/IEEE 802.3x standards
- Ethernet port supports 10/100/1000M adaptive
- Support port auto flip (Auto MDI/MDIX)
- Support sequence port PoE priority, the higher the port priority
- Three-speed one-button intelligent dial switch with support for VLAN mode, Default mode and Extend mode
- Support Watchdog Function
- Port 1/2 supports HiPoE and the power can reach 60W
- Lightning Protection Surge: General Mode 4KV, Differential Mode 2KV, ESD 8KV.
